Labs - Unit 1 – Primitive Types

Topic 1.1 – Why Programming? Why Java?

1.1.1 - NameAndSchool - Write a program that will print your first and last name separated by a space on one line followed by the name of your high school on the next line. You must use two statements to print your first and last name.

```
first last  
my high school
```

1.1.2 - TimeAndDate - Write a program that will print the current time *hh:mm* and the current date *mm/dd/yyyy* each on a separate line. Use string literals for the time and date.

```
9:20  
5/6/2019
```

1.1.3 - Sentence - Write a program that will print this sentence "It is a great time to be a computer programmer!" on three separate lines as shown in the example output below.

```
It is a great  
time to be a  
computer programmer!
```

1.1.4 - Sentence2 - Write a program that will print this sentence "It is a great time to be a computer programmer!" all on one line as shown on the right. You must use three statements to produce the output.

```
It is a great time to be a computer programmer!
```
